

## Snow Policy

When snow is forecasted HOA management may have a vendor place brine down (weather dependent) on the main corridors and Farmhouse parking. This will help prevent snow from sticking to the pavement and make plowing and salting more effective.

If snow or freezing rain begins to fall, management may authorize salt/ice melt to be spread on the loop from the entrance on Daniel Ridge to the Farmhouse, down Vintage Point to Iron Mill and back out to Daniel Ridge. This is done as the salt/ice melt prevents ice from forming and begins the melting process.

Management has the authority to update or amend this policy during the event as approved by the Board of Directors.

This Snow Policy is subject to change based on actual weather conditions as deemed appropriate by management pending board approval.

Have a great snow day!
